

PRODUCT INFORMATION

Central Cable Channel Holder for QR60 posts

The central cable channel holder is driven into the head of the post in place of the plastic plug. It is limited to cable channels up to 100 mm wide and can be used for all types of posts (DP, EP, TP) with QR60.

On-site installation of the cable channel holder is easily possible. The cable channel holder is screwed to the cable channel using the provided self-tapping screw. The requirement for this is that the cable channel is laid centrally over the post and the fence.

Advantages

- › Quick installation by driving into the post
- › Integrated potential equalisation (automatically achieved during installation)
- › Retrofitting to existing systems possible

Technical Data Central Cable Channel Holder

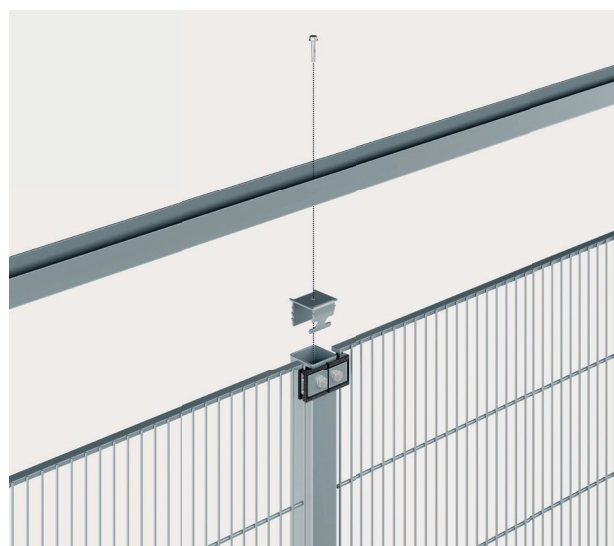

Packaging Unit 10 pieces

Fence Systems (min. system height: 2600 mm) Flex, Flex Hohe Zaunplanung, Brühl Wall

Material Galvanised Steel Sheet

Colour Galvanised Steel

Potential equalisation Cable channel holder conductively connected to the post
